Environmental

What is Huma Pro[®] 16?

HUMA PRO[®] 16 complexed with Micro Carbon Technology[®] (MCT) is an activated liquid humic acid carbon source derived from a highly oxidized, naturally occurring carbon and mineral deposit. For soil lacking sufficient carbon, HUMA PRO[®] 16 stimulates and maintains microbial growth. For the treatment of unbalanced soil conditions caused by the lack of available carbon, HUMA PRO[®] 16 promotes microbial growth for a healthier soil. This product is non-toxic, concentrated, and easy to use.

What does Huma Pro[®] 16 do?

BENEFITS FOR USE IN SOIL:

- Acts as a soil conditioner and improves soil structure.
- Acts as a carbon source and stimulant for microbial colonies.
- Affects physical and chemical properties to improve soil fertility by providing a storage system for carbon, water, and minerals.

DEFICIENCY SYMPTOMS - WHEN TO APPLY:

- Soils contaminated with nitrogen, phosphorus, herbicides, or pesticides.
- Soils with low available carbon content.

DIRECTIONS FOR USE: Should be applied when a soil analysis identifies the need for this product. It can be applied in combination with compatible liquid nutrient mixes. If compatibility is in question, jar test a small quantity. Do not apply this product in concentrations greater than 10% in soil applications. Applications in soil can be made as often as every 14 to 28 days as needed. Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided.

This product is intended as a supplement to a complete nutrition program and will not, by itself, provide all the nutrients normally required by micro organisms.
