

Guaranteed Analysis

0-0-3

Soluble Potash (K₂O)3.0%

Derived from potassium hydroxide

Also contains beneficial substances:

Total Humic Acid (HA) and

Fulvic Acid (FA) 70.0%
(Analysis using the Colorimetric Test Method)

Other Test Methods:

Total Humic Acids (HA)40.0%
(Analysis using the HPTA or ISO 19822 Method)

Total Humic Acids (HA) 35.0%
(Analysis using the CDFM Method)

Derived from humic substances; less than 3% dust and 18% moisture.

Physical Properties:

Form: Dry granule

Appearance: Dark reddish-brown-to-black particles/dust having no odor.

Product Density: 47-48 lb/ft³

Net Weight: 50 lb / 22.68 kg

Caution:

Keep out of reach of children. Harmful if swallowed. Ingestion of this product may cause gastrointestinal irritation or pain.

Storage and Disposal:

Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state, and/or federal regulations.

Conditions of Sale:

The information contained on this label is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, plant and soil conditions, and other factors are beyond the control of the seller.

The Organic Solution for Stimulating Soil and Crops

Huma[®] K Hume[®] OM is a natural humic and fulvic acid product processed from naturally occurring, oxidized humic substances. Humic and fulvic acids add organic matter to soils—which stimulates soil microbial life and soil fertility, enhances plant nutrient availability and uptake, improves root development and root mass and growth, and increases crop quality and yield.

K Hume[®] OM is a 70% humic and fulvic acid activated with a potassium coating that becomes an excellent soil conditioner. Improved solubility (76% soluble) speeds activity in the soil for enhanced microbial uptake and growth. The product is coated and screened to various particle sizes (the standard size is 1–3 mm, custom sizes are available). It also contains many supplemental natural minerals in trace amounts.

Benefits of Use:

- Uniform granular size promotes even coverage/distribution of humic/fulvic acid for short-term carbon benefit
- With the potassium coating, becomes a short-term soil organic-matter builder
- Increased water penetration
- Increased flocculation of clays
- Promotes conversion of fertilizer into plant-available food
- Increases soil nutrient mineralization
- Short-term soil microbial activation

Application Instructions:

Designed as an activated potassium humate with enhanced solubility that is to be applied to the soil. Best results will be obtained when applied directly to the soil followed by shallow incorporation or irrigation. Apply by broadcast, whether through air or ground machine. Can be applied to all soil types for agricultural fields, ornamentals, lawns, gardens, and landscapes. Avoid spreading during high humidity. Soil moisture is required for maximum bioactivity: if soil is dry, moisture should be provided by irrigation. Applications can be made as often as every 30 days, as needed.

METHOD OF APPLICATION	SUGGESTED RATE		
	Field Crops	Tree or Vine Crops	Turf or Horticulture
Soil banded or side dressed	Up to 38 lb/acre, 38 kg/ha	Up to 75 lb/acre, 75 kg/ha	3.5 lb/1,000 ft ² , 1.5 kg/100 m ²
Soil broadcast incorporated	Up to 75 lb/acre, 75 kg/ha	Up to 150 lb/acre, 150 kg/ha	7.0 lb/1,000 ft ² , 3.0 kg/100 m ²
