HUMA®

OM 2-6mm

INSTRUCTIONS

PREPARATION: Adds naturally occurring materials containing humic acids to soil that may increase plant nutrient availability and uptake, water use efficiency, and growth of beneficial microbes, which optimize soil conditions for increased plant vigor and resistance to abiotic stress. Should be applied when tissue and soil analysis identify the need and proper rate of application for this product. Can be applied in combination with compatible granular fertilizers. Avoid mixing with high-moisture fertilizers such as granular urea.

APPLICATION: Designed to be applied to the soil. Best results will be obtained when applied directly to the soil followed by shallow incorporation or irrigation. Apply by broadcast, whether through air or ground machine. Can be applied to all soil types for agricultural fields, ornamentals, lawns, gardens, and landscapes. Avoid spreading during high humidity. Soil moisture is required for maximum bioactivity: if soil is dry, moisture should be provided by irrigation. Applications can be made as often as every 30 days, as needed.

CONDITIONS: Application timing, intervals, and rates may vary according to individual plant requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the plants.

CONSULT: Consult your local Huma® Representative or qualified individual/institution for use-specific recommendations.

STORAGE & DISPOSAL: Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state, and/or federal regulations.

DISCLAIMER: This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by plants.

GUARANTEED ANALYSIS

CONTAINS NON-PLANT FOOD INGREDIENTS
SOIL AMENDING ACTIVE INGREDIENTS

Humic Acids* (Derived from leonardite) 40.0%
Inert components of leonardite 60.0%

*Analysis using the HPTA or ISO 19822 Method

Less than 3% dust and 18% moisture.

SOIL AMENDMENT

Applications can be made as often as every 30 days, as needed.

APPLICATION

METHOD	SUGGESTED RATE		
	Field Crops, Sod, and Specialty Crops		Tree or Vine Crops
Soil banded or side dressed	Up to 75 lb/ac, 75 kg/ha	7 lb/1,000 ft², 3 kg/100 m²	Up to 150 lb/ac, 150 kg/ha
Soil broadcast incorporated	Up to 150 lb/ac, 150 kg/ha	14 lb/1,000 ft², 6 kg/100 m²	Up to 300 lb/ac, 300 kg/ha

Product Density: 45–48 lb/ft³

Net Wt. 50 lb
Net Wt. 22.68 kg
