HUMA®

STABLESOL® POWDER

INSTRUCTIONS

PREPARATION: Adds naturally occurring materials containing humic and fulvic acids to soil that may enhance soil health for plant nutrient availability and uptake, water use efficiency, growth of beneficial microbes, and crop vigor to overcome abiotic stress. Should be applied when soil analysis identifies the need and proper rate of application for this product. The product is stable over a pH range of 2.0 to 12.0. This unique feature allows the product to be mixed and applied with most commercially available fertilizers and micronutrients. Can be applied in combination with compatible plant growth regulators, pesticides, or other fertilizer solutions. If compatibility is in question, jar test a small quantity.

APPLICATION: Designed to be put into solution and applied to foliage or the soil. Apply with sufficient water to ensure uniform coverage. Best results will be obtained when application is concentrated in the active root zone or when applied directly to the soil followed by shallow incorporation or irrigation. Apply by broadcast spray, whether through fertigation, drip, or spray machine. Can be applied to all soil types for agricultural fields, ornamentals, lawns, gardens, and landscapes. Avoid spreading during high temperatures or in times of drought. Soil moisture is required for maximum bioactivity: if soil is dry, moisture should be provided by irrigation. Applications can be made as often as every 15 days, as needed.

CONDITIONS: Application timing, intervals, and rates may vary according to individual plant requirement, stage of development, available nutrient levels in the soil, and overall nutritional status of the plants.

CONSULT: Consult your local Huma® Representative or qualified individual/institution for use-specific recommendations.

STORAGE & DISPOSAL: Keep product in original bag. Do not transfer into food or drink containers. Always dispose of bag in accordance with local, state, and/ or federal regulations.

DISCLAIMER: This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by plants.

GUARANTEED ANALYSIS

Soluble Potash (K_2O) 17.0%
Sulfur (S) 7.0%

Derived from Potassium Hydroxide and Potassium Sulfate.

ALSO CONTAINS BENEFICIAL SUBSTANCES:
Humic Acids 70.0%
(Analysis using the $BaCl_2$ Method)

Derived from leonardite.

SOIL AMENDMENT

Do not apply this product in concentrations greater than 10% without a jar test.

Applications can be made as often as every 15–30 days, as needed.

APPLICATION

CROP TYPE	SUGGESTED RATE
Field crops, sod, and specialty crops	Up to 5 lb/ac (5 kg/ha), diluted with water
Tree and vine crops	Up to 10 lb/ac (10 kg/ha), diluted with water

Product Density: 36.5 lb/ft³

Net Wt. 55 lb
Net Wt. 25 kg

SAFETY

KEEP OUT OF REACH OF CHILDREN

Information regarding the contents and levels of metals in this product is available on the Internet at: http://www.aapfco.org/metals.html

Ingestion of this product may cause gastrointestinal irritation or pain. Inhalation of dust may cause respiratory irritation.

CLASSIFICATION: RESPIRATORY TRACT IRRITATION– HAZARD CATEGORY 3
SIGNAL WORD: WARNING
HAZARD STATEMENT: H335; May cause respiratory irritation.
PRECAUTIONARY STATEMENT: P261, P271; Avoid breathing dust. Use only outdoors or in a well-ventilated area. P304+P340, P319; IF INHALED: Remove person to fresh air and keep comfortable for breathing. Get medical help if you feel unwell.

PRODUCT CHARACTERISTICS: A brown powder having a mild characteristic odor.

CONDITIONS OF SALE: The information contained on this label is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, plant and soil conditions, and other factors are beyond the control of the seller.
