The Solution for Vigorous, Healthy Plant Growth

Huma® Vitol®, carbon-complexed with Micro Carbon Technology®, feeds the natural metabolic processes within the plant for vegetative development and fruit sizing. It increases the nutrient uptake of the plant and smoothly transitions the plant through its growth stages. It also improves plant recovery from environmental stresses during peak crop demand periods. When soil-applied, Vitol® provides necessary nutrients for root growth and elongation that are critical in tap root crops.

Benefits of Use:

- Increase foliar growth at emergence
- Maintain late-season growth and vigor
- Increase fruit size
- Improve uniformity of fruit size
- Give plants energy

Notes:

- Vitol® is an excellent carrier for other nutrients.
- Vitol® can be applied to soil as a taproot stimulator.
- Apply Vitol® at highest rates together with Huma® Cobalt at 2–4 ounces per acre (150–300 mL per hectare) to overcome environmental stresses such as herbicide or salt damage, frost or hail damage, and disease and insect damage.

Application Instructions:

SHAKE WELL BEFORE USING. Designed for soil and/or foliar application. Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. If compatibility is in question, jar test a small quantity. Do not foliarly apply this product in concentrations greater than 10% without a preliminary foliar test.
